

AMAN DIXIT

Bengaluru, Karnataka, India | +91-8595604117 | dixitaman.nov.wwe@gmail.com | linkedin.com/in/aman-dixit-la999117a

PROFESSIONAL SUMMARY

Full-Stack MERN Developer with 5+ years of experience designing and delivering end-to-end web and mobile applications — from pixel-perfect React.js frontends to robust Node.js/Express.js backends and scalable MongoDB databases. Proven expertise in building RESTful APIs, microservices architectures, real-time WebSocket systems, React Native mobile apps, and AI-powered solutions serving 10,000+ users. Equally strong in frontend (React.js, Next.js, TypeScript, Redux, MobX, HTML5/CSS3) and backend (Node.js, Express.js, Python, REST APIs, GraphQL, JWT, OAuth). Hands-on with Agentic AI, LLM integration, Python-based AI tooling, and RAG pipelines. Committed to clean code, TDD, cross-browser compatibility, performance optimization, and CI/CD best practices in Agile environments.

TECHNICAL SKILLS

MERN Stack (Core): MongoDB | Express.js | React.js | Node.js — Full-Stack expertise across all four layers

Frontend: React.js | Next.js | React Native | TypeScript | JavaScript (ES6+) | HTML5 | CSS3 | Redux | MobX | Context API | Responsive Design | Cross-Browser Compatibility | Material-UI | Bootstrap | Webpack | Vite

Backend: Node.js | Express.js | Python | PHP | C# | REST API Design | GraphQL | Microservices | WebSockets | JWT Authentication | OAuth 2.0 | API Gateway | Server-Side Rendering

Databases: MongoDB | MySQL | PostgreSQL | Redis | Database Design | Query Optimization | Indexing Strategies | Data Modeling | ACID Compliance

Mobile Development: React Native | Android / iOS App Development | Xcode | Android Studio | Cross-Platform Debugging

Testing & Quality: Jest | Mocha | PHPUnit | Selenium | TDD | Integration Testing | Automated Testing | Code Review | 80%+ Code Coverage

AI & GenAI: LLMs | Agentic AI | OpenAI GPT | Claude API | Prompt Engineering | RAG | MCP (Model Context Protocol) | Python AI Tooling | AI-assisted SDLC

DevOps & Cloud: Docker | Jenkins | CI/CD Pipelines | Git | GitHub | GitLab | AWS | GCP | Nginx | Linux

Tools & Methodologies: Jira | Confluence | Agile | Scrum | Kanban | System Design | OOP | Design Patterns | SDLC

PROFESSIONAL EXPERIENCE

Senior Software Engineer

07/2024 – 03/2026

Advantage AI Engineering Private Limited | Bengaluru, India

- Led full-stack development of 3 AI-powered healthcare applications using the complete MERN stack (React.js, Express.js, Node.js, MongoDB) integrated with Python-based AI microservices — handling 50,000+ API requests daily at 99.5% uptime.
- Engineered Node.js/Express.js RESTful APIs and Python (FastAPI) microservices for real-time chat, video consultation, and medical data processing — reducing API response latency by 35%.
- Built and maintained MongoDB schemas, indexing strategies, and aggregation pipelines to support high-volume healthcare data, improving query performance by 40% and reducing server load during peak hours.
- Developed responsive, accessible React.js frontends with TypeScript, Redux, and MobX — converting Figma UI/UX designs into clean, reusable component libraries with cross-browser compatibility.
- Built Agentic AI workflows and LLM integration pipelines (OpenAI GPT, Claude API) using Python and RAG architecture, enabling intelligent document processing, medical Q&A, and context-aware AI responses.
- Integrated MCP (Model Context Protocol) and Prompt Engineering patterns for AI agent orchestration with dynamic tool-use capabilities.
- Built React Native mobile interfaces (Android & iOS) for patient-facing features, achieving performance and UX parity with the web application.
- Designed and maintained CI/CD pipelines using Jenkins and Docker, automating build, test, and deployment workflows — cutting release cycles by 40%.

- Implemented Python-based automated security scanning and quality gates, achieving a 60% reduction in critical production incidents.
- Led code reviews and engineering standards for a team of 8 developers using JavaScript, TypeScript, Python, Node.js, and React.js, improving code quality metrics by 35%.

Senior Software Engineer

09/2023 – 04/2024

NIIT | Bengaluru, India

- Delivered 15+ full-stack features end-to-end — React.js (TypeScript, Redux) frontend, Node.js (Express.js) REST APIs, and PHP/MySQL backend — ensuring responsive UI and robust server-side logic.
- Designed and built REST API endpoints in Node.js and PHP handling authentication, data retrieval, and business logic, improving cross-service reliability by 30%.
- Converted UI/UX designs into pixel-perfect, accessible React.js components with full cross-browser compatibility (Chrome, Firefox, Safari, Edge).
- Integrated multiple third-party REST APIs and managed service dependencies, strengthening inter-service communication reliability by 30%.
- Refactored legacy PHP/JavaScript codebase into modern TypeScript + React component architecture, reducing frontend bundle size by 25%.
- Mentored 3 junior developers through pair programming and code reviews, increasing team productivity by 20% and reducing bug escape rate by 45%.
- Participated in sprint planning and system design reviews, contributing backend scalability improvements and frontend architecture decisions.

Senior Software Developer

12/2021 – 06/2023

Ksolves India Limited | Bengaluru, India

- Architected and shipped 12+ major features for a SaaS platform using React.js, Next.js (SSR/SSG), Node.js, Express.js, and MongoDB — serving 10,000+ monthly active users.
- Built and maintained Node.js/Express.js backend services including REST API endpoints, business logic layers, authentication (JWT/OAuth), and third-party service integrations (payment gateways, email).
- Designed MongoDB data models and optimized complex aggregation queries, reducing page load times by 30% and improving overall application throughput.
- Developed scalable React.js frontends with Next.js SSR for SEO and performance, using Redux and Context API for state management across complex multi-page applications.
- Built comprehensive Jest and Mocha test suites covering unit, integration, and API tests — achieving 80% code coverage and reducing regression bugs by 55%.
- Integrated REST APIs and third-party services into both React frontend and Node.js backend, ensuring end-to-end data flow integrity.
- Conducted 50+ code reviews across frontend (React.js, TypeScript) and backend (Node.js, MongoDB), enforcing clean code, design patterns, and performance best practices.

Software Developer

06/2020 – 11/2021

LitSpark Solutions | Bengaluru, India

- Built 6 full-stack web applications using JavaScript, React.js, Node.js, PHP, MySQL, HTML5, and CSS3 — delivering end-to-end solutions for education and retail clients.
- Developed RESTful APIs and server-side logic in Node.js and PHP, and designed MySQL relational schemas — improving application performance by 25% and supporting 5,000+ concurrent users.
- Implemented AJAX-based dynamic React interfaces with real-time data updates, creating seamless frontend-backend integrated user experiences.

Software Engineer

06/2019 – 04/2020

Get Ahead Education Limited | Bengaluru, India

- Built end-to-end HR management system using PHP, MySQL, and JavaScript — automating recruitment, onboarding, and separation workflows for 200+ employees with secure role-based access control.
- Developed student challenge registration platform with full backend logic in PHP/MySQL, processing 1,000+ registrations with authentication and session management.
- Created automated reporting engine generating financial and operational reports, reducing manual effort by 80% and improving data accuracy.

TECHNICAL PROJECTS

Diagnostic Healthcare Platform | Full-Stack & AI Engineer

- Engineered HIPAA-compliant platform end-to-end: React.js frontend, Node.js/Express.js API layer, Python (FastAPI) AI microservices, MongoDB database, and WebSocket real-time communication.
- Integrated Agentic AI features — LLM-based symptom analysis and Python RAG pipeline — enabling intelligent, context-aware patient-doctor interactions.
- Designed microservices architecture with API gateway handling 10,000+ daily requests at 99.9% availability and sub-2-second response times.

Countabout Financial Platform | Full-Stack Developer

- Built scalable financial transaction system with React.js dashboards for 5 user roles and Node.js/MongoDB backend handling 500+ active accounts with ACID-compliant data integrity.
- Developed secure payment API integration and real-time balance calculation engine with robust backend business logic.

Gezeno E-Commerce Platform | Full-Stack Developer

- Delivered complete e-commerce solution: React.js storefront, Node.js/Express.js REST APIs, MongoDB product/order database, multi-gateway payment integration, and custom CMS — processing 2,000+ monthly transactions.
- Implemented full order lifecycle: cart, checkout, inventory management, automated email notifications, and real-time stock updates across frontend and backend.

Restaurant Management System | Full-Stack Developer

- Built restaurant POS system with React.js UI, Node.js backend, MySQL database, and multi-payment gateway integration including COD and online payments.
- Implemented session-based authentication, order tracking API, and real-time admin sales dashboard with full backend and frontend integration.

EDUCATION

Bachelor of Computer Applications (BCA)

04/2020

IFIM College, Bengaluru

Senior Secondary – Commerce

03/2017

Little Flower School, Gorakhpur

CERTIFICATIONS

MERN Full-Stack Development Certification

Udemy

MongoDB | Express.js | React.js | Node.js — Building production-grade full-stack e-commerce applications

Google Project Management Professional Certificate

Coursera

Agile Project Management | Sprint Planning | Stakeholder Communication | Scrum Delivery
